

ABLE ENGINEERING LIMITED

ESTABLISHED 1988

FLOOD COVER

The Able Engineering “**FLOOD COVER**” has been developed as a lightweight easy to fit flood protection barrier.

The standard flood cover is manufactured in aluminium and designed to fit in seconds over most traditional household entrances.

It incorporates internal flexible seals which lock into place onto a low visibility stainless steel channel section sealed around the doorway entrance.

A standard self assembly kit costs **£285.00** + post & packing. + VAT

The Flood Cover kit can also be manufactured to fit most doorway openings and is easy to install by any competent handy person, arrangements can also be made to have the door opening measured and the installation carried out by a competent trade’s person.

We are also able to supply other flood protection products:- such as:

Air Brick covers for single or multiple uses.

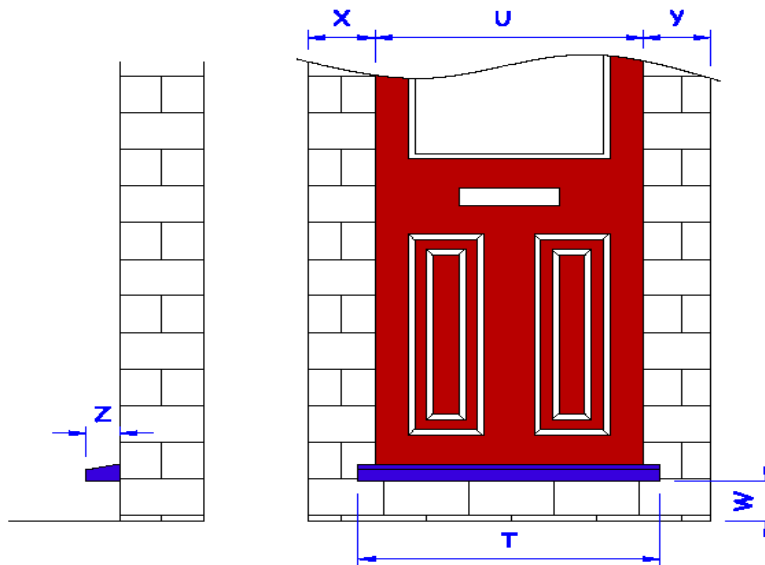

Toilet plug for prevention of sewerage backflow

Order Online or call 01553 691870
